

Supplementary Material

Fig. a

Radiograph showing neutral medial cortical support. The medial cortex of the head–neck and the shaft fragments reach a visually anatomical reduction.

Fig. b

Radiograph showing implant failure.

Fig. c

Radiograph showing varus displacement.

Fig. d

Radiograph showing excessive lateral migration of the blade.

Table i. Demographics of the included and excluded patients

Variable	Included	Excluded due to poor postoperative radiographs	Excluded due to loss to follow-up
n	127	19	22
Mean age, yrs (range)	70.6 (27 to 94)	66.7 (31 to 87)	69.3 (37 to 88)
Male, n (%)	54 (42.5)	8 (42.1)	9 (40.9)
Female, n (%)	73 (57.5)	11 (57.9)	13 (59.1)
