

Bone & Joint Open

Supplementary Material

Table i. Reoperation groups based on procedural codes from the Swedish Fracture Register, the Swedish Arthroplasty Register, and the National Patient Register.

| Reoperation group | Description including procedural codes |
|-------------------------------------|---|
| Arthroplasty after failure of IF | Index treatment is NFJ* and reoperation treatment is NFB* |
| Extraction of IF | Index treatment is NFJ* and reoperation treatment is NFU* |
| Reoperation due to infection | Index treatment is either NFJ* or NFB* and reoperation treatment is NFW*, QD* or NFS* |
| Revision arthroplasty | Index treatment is NFB* and reoperation treatment is NFC* |
| Excision arthroplasty (Girdlestone) | Index treatment is either NFJ* or NFB* and reoperation treatment is NFG* |

**The following two or three letters indicate that the code includes all subcategories of the specified procedure. IF, internal fixation.*
